FRANCISCO JAVIER AGUERO JR.

385-229-5830 | **blast255@live.com** | GitHub Portfolio

PROFESSIONAL SUMMARY

Aspiring **Frontend Engineer** with a strong foundation in **Systems Engineering** and a focus on building high-performance, responsive web applications. Expert in modern JavaScript environments (Node.js, Express) and UI styling frameworks. Proven track record of cross-functional collaboration and independent problem-solving in fast-paced operational environments.

TECHNICAL SKILLS

- **Languages & Core:** HTML5, CSS3, JavaScript (ES6+), Node.js, SQL
- **Frameworks & Libraries:** Express.js, Bootstrap, EJS, Axios, PostgreSQL
- **Tools & APIs:** REST APIs, JSON, Git/GitHub, VS Code, Vercel, DOM Manipulation
- **Design & Soft Skills:** UX/UI Design Principles, Responsive Web Design, Agile Mindset, Fluent in Spanish

---

KEY TECHNICAL PROJECTS

Weather API Application | *Node.js, Express, REST API, EJS*

- Developed a dynamic weather application that fetches real-time data from external REST APIs.
- Implemented server-side rendering using EJS and managed data flow with JSON.
- Designed a fully mobile-responsive interface using Bootstrap for seamless cross-device use.

Full-Stack Blog Website | *Node.js, Express, Vercel, JavaScript*

- Engineered a content-driven blog platform featuring full CRUD-like capabilities and responsive design.
- Integrated Git-based workflow for deployment via Vercel, ensuring continuous integration.
- Optimized user experience by focusing on clean navigation and UI hierarchy.

Personal Portfolio Suite | *HTML, CSS, Bootstrap, GitHub Pages*

- Architected and deployed a multi-site portfolio to showcase technical proficiency and project documentation.
- Utilized Git for version control and GitHub Pages for hosting.

WORK HISTORY

In-bounding Specialist / Forklift Operator | Agile Supply Chain Strategies

Apr 2025 – Present | Salt Lake City, UT

- Optimize inbound shipment processing and inventory accuracy through meticulous data tracking.
- Collaborate with cross-functional teams to streamline warehouse operations and safety protocols.

Lead Warehouse Associate (Levels 1–3) | Deseret Industries

Apr 2023 – Mar 2025 | West Valley City, UT

- Promoted through three levels of responsibility based on performance and reliability.
- Managed inventory rotation and high-value goods while operating heavy machinery (order pickers/forklifts).
- Consistently praised by management for proactive problem-solving and multitasking during peak hours.

EDUCATION

Bachelor of Science: Systems Engineering *Texas A&M International University*
